

Caring for the Whole Person

INSIDE AND OUT

Our Clinical Services (also known as behavioral services)

The Support, Inc. Network treats the whole person, taking into account their physical and mental symptoms as well as their emotional needs. We offer assessments, consultations, individual and group sessions online and in person through the HCBS DD-Waiver. We specialize in person-centered and trauma-informed behavioral and mental health therapy.

The Support, Inc. Network Difference

As the leading provider of community-based solutions for individuals with intellectual and developmental disabilities, we do things differently. We help individuals develop skills, build confidence and turn possibilities into realities by offering a wide range of residential, day and clinical services.

*Of the individuals and families we serve,
96% would recommend The Support, Inc. Network to others.*

Serving individuals and families throughout Colorado.

The Support, Inc. Network believes in an early intervention and whole person approach – utilizing evidence-based practices that integrate applied behavioral analysis and mental health interventions.

Our clinical team is comprised of highly-experienced, masters-level professionals, including LPC, LCSW and OT.

Residential Support Services

We provide ongoing clinical care - such as behavioral and therapeutic supports - for those in residential programs. We work closely with the individual's entire support team to develop individualized plans, provide direct counseling, supports and ongoing monitoring.

How it Works

We start with an integrative assessment and work directly with individuals, caregivers and providers to assess symptoms, evaluate problem areas and set long-term, emotional management goals for individuals. Then the team works together to develop an evidence-based and thoughtfully constructed plan that involves training the people involved in the individual's day-to-day activities, as well as teaching the individual how their body responds to stress and other emotions through sessions done in an individual or group setting.
