

DAY SERVICES

Making the Most of Every Day

EXPERIENCE EVERY DAY TO THE FULLEST

Our Day Services

The Support, Inc. Network provides many opportunities for individual and group social activities, life skills development, work experience and individual support through our programs and community partnerships.

The Support, Inc. Network Difference

As the leading provider of community-based solutions for individuals with intellectual and developmental disabilities, we do things differently. We help individuals develop skills, build confidence and turn possibilities into realities by offering a wide range of residential, day and clinical services (also known as behavioral services).

Of the individuals and families we serve, 96% would recommend The Support, Inc. Network to others and 97% are happy with our day program services.

Serving individuals and families throughout Colorado.

At The Support, Inc. Network we believe in a holistic approach to care. We are dedicated to providing services that are truly person-centered and person-directed.

Individuals receiving our services, meet with our day services team regularly to discuss and plan activities. Through our day service programs we provide individuals with stimulating activities and interactions while also offering therapeutic benefits. Whether it's at our locations or our community-focused events and interactions, we know that by carefully integrating sensory experiences, thoughtful communication and skills development, we're creating a rich environment for growth and discovery.

Day Program

With locations throughout Colorado, our day program provides onsite activities and access to community events. Participant led and guided, our program is unique and incorporates non-traditional skill building activities. Individuals can join in person and virtually.

Community Access Program

Through our community access program, we provide individual support to enhance in-person and virtual community engagement in activities across the front range. Regardless of where the individuals we serve live, chances are we have something happening nearby. Our goal is to create activities, partnerships and opportunities where individuals can engage their minds and bodies and simply have fun.

One-on-One Support

The Support, Inc. Network provides customized, one-on-one support to assist individuals with goals and independent living skills.
