

We All Need a Place to Belong

NOTHING FACILITATES QUALITY OF LIFE LIKE A NURTURING, SAFE AND ENGAGED HOME

Our Residential Services

The Support, Inc. Network's flexible, personalized approach allows for a variety of home care scenarios designed to offer thoughtful care in an environment where individuals can flourish. We're creating a home for the individuals we serve and nothing is more important than ensuring it's safe, nourishing and...feels like home.

The Support, Inc. Network Difference

As the leading provider of community-based solutions for individuals with intellectual and developmental disabilities, we do things differently. We help individuals develop skills, build confidence and turn possibilities into realities by offering a wide range of residential, day and clinical services (also known as behavioral services).

*Of the individuals and families we serve,
96% would recommend The Support, Inc. Network to others.*

Serving individuals and families throughout Colorado.

Taking into careful consideration each person's individual needs, The Support, Inc. Network works to provide the best residential environment for everyone involved. Our residential services include the following three programs.

Host Home

Our host home providers are committed to providing a nurturing, supportive and safe home atmosphere that allows for growth and discovery. Residents will have an opportunity to thrive in a secure, caring environment and be more engaged in the world around them.

Providers are pre-screened through background and reference checks, as well as home safety inspections. They also receive extensive, ongoing training in the intellectual and developmental disabilities field and have access to additional support and oversight from a residential program coordinator, nurse, clinician and public benefits specialist.

Family Caregiver Program

Through the Family Caregiver Act, family caregivers may be eligible for both financial and non-financial support. Support, Inc. gives families maximum flexibility to create an individualized plan tailored to their needs. Families can:

- Pay a family caregiver to provide care for a loved one
- Hire a non-family caregiver to provide care
- Cover or reimburse costs related to life events and needs outside of traditional staffing

We also provide:

- Screening for non-family caregivers
- Residential support and respite care options matched to the family's level of need
- Training for family and non-family care givers
- Competitive pay rate, flexible budgets and access to Support, Inc.'s employee benefits plan and 24-hour support line

Independent Apartment Living Program

We help individuals find apartments that meets their unique needs. We also assist with general care and skills development, such as grocery shopping, medical appointments, transportation and provide a 24-hour support line.
